Introduction to COBIT 5

This one-day “Introduction to COBIT 5” course provides an introduction to the COBIT 5 governance framework from ISACA. This course will provide participants with an excellent insight into the framework and explain the differences between COBIT 4.1 and COBIT 5. This course is recommended for those preparing for additional COBIT 5 training.

About COBIT 5
COBIT 5 is ISACA’s latest business framework for the governance and management of enterprise IT. This evolutionary version incorporates the latest thinking in enterprise governance and management techniques, and provides globally accepted principles, practices, analytical tools and models to help increase the trust in, and value from, information systems.

COBIT 5 builds and expands on COBIT 4.1 by integrating other major frameworks, standards and resources, including ISACA’s Val IT and Risk IT, Information Technology Infrastructure Library (ITIL®) and related standards from the International Organization for Standardization (ISO). This course is recommended for IT professionals working in audit, assurance, risk, security and governance.

Learning Objectives
At the conclusion of this course, participants will be able to:
- Discuss how IT management issues affect organizations
- Understand the principles of the Governance of Enterprise IT and explain the differences between management and governance
- Assess how the COBIT 5 processes help guide the creation of the five basic Principles and the seven Governance and Management Enablers
- Discuss the COBIT 5 Enablers, including the Goals Cascade and the Process Reference Model
- Describe the basics of how to implement COBIT 5
- Understand the differences between COBIT 4.1 and COBIT 5 and what to consider when transitioning
- Explain the benefits of using COBIT 5

Course Outline

Participants will learn through discussion and practical examples how to apply COBIT 5 in their organisations and improve IT governance, management and operational processes.

This workshop comprises the following:
* Module 1: Purpose/Introduction to COBIT 5
* Module 2: COBIT 4.1 to COBIT 5, the differences
* Module 3: COBIT 5 Principles
* Module 4: Implementing COBIT 5

Who Should Attend

IT professionals working in audit, assurance, risk, security and governance

Course Leader

Sushil Chatterji is Director & Principal Consultant of Edutech Enterprises, a specialist advisory consulting and training company. Sushil has been providing consulting and training services in Europe and the South East Asian region over the last 10 years. His primary areas of engagement are in Business Governance of IT, Enterprise Architecture for Business Transformation. He is concurrently partner of ICT Control in Brussels which is a consortium of specialists. In this affiliation, he is responsible for the Enterprise Architecture and Value Governance practice areas.

Sushil holds a Masters degree in Business Management, professional certification in the Governance of Enterprise IT (CGEIT), and is a Certified Enterprise Architect (CEA) from Carnegie Mellon University’s Institute of Software Research, as well as certified in TOGAF which is a framework for Enterprise Architecture.

Having more than 25 years’ experience in the IT industry with IBM, the Singapore National Computer Board, and META Group, Sushil works independently and together with associates to provide learning, facilitation and strategy deployment services to assist organisations in integrating process, knowledge, technology and change approaches for improving business and organisational performance. A strong proponent of Governance of IT, and Enterprise Architecture for Business Transformation, Sushil advises, coaches, trains and mentors using best practices, frameworks and process-improvement methodologies.

Besides providing advisory consulting services to clients, he conducts training at the Solvay Brussels School of Economics and Management (a leading business school in Europe which is part of Université Libre de Bruxelles, and an affiliate of the IT Governance Institute) for the ISACA CGEIT certification (Certified in the Governance of Enterprise IT), and IT Management courses. Sushil is also an accredited trainer with ISACA on the CobiT Foundation, and the IT Governance implementation courses. He is a member of the ISO Work Group that has established and is continuing to develop global ICT Governance standards – ISO/IEC 38500 – as subject matter expert. He is also the author the official 2010 CGEIT Review Manual.
